

Model: 2052

The contact-free VOLTfix has been developed for voltage testing on insulated cables and conductors.

For testing, no electrical connection to UUT is required. A second connection, e.g. to neutral or ground is not necessary.

The VOLTfix does not require maintenance. It is equipped with protective insulation. Power is supplied by means of two conventional micro batteries 1.5 V IEC LR03.

Features:

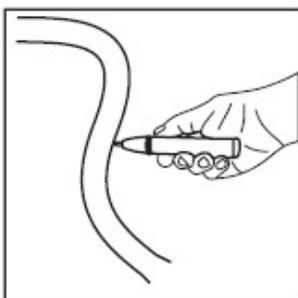

- Contact-free, optic and acoustic detection of AC voltages
- Swift and exact detection of line interruptions in accessible cables, e.g. cable reels.
- Reliable, automatic self-test indicated by optical stand-by display when switching on the instrument
- Compact, handy construction, fits in any pocket
- Large application area for trade and industry
- On/Off switch

Scope of Supply:

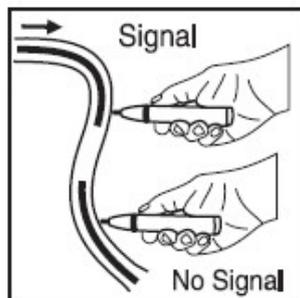

- 1 pc UNITEST VOLTfix plus
- 2 pc Batteries 1,5 V, IEC LR03
- 1 pc Instruction Manual

Technical Data:

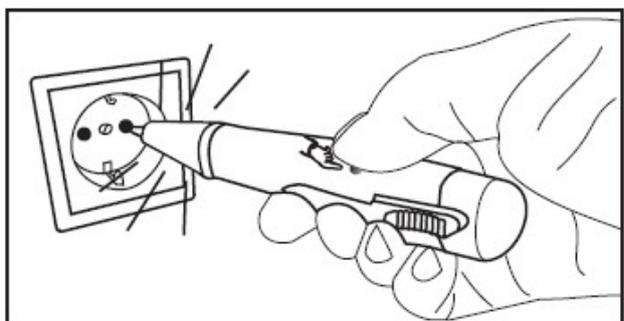

Display	1 LED
Voltage Range	50...600 V AC
Frequency Range	50...500 Hz
Operation time	continuous
Measurement category	CAT III / 600 V
Pollution Degree	2
Safety complying with	IEC 61010, EN 61010
Power Supply	2 x 1.5 V, IEC LR03
Dimensions	140 x 24 x 20 mm
Weight	approx. 50 g

Voltage test at Insulated conductors

Locating line interruption
i.e. cable drums etc.

Phase finding on socket outlets
